

LIVEACTION CASE STUDY

Fortune 500 Automotive & Transport Company Selects LiveAction for SDWAN Visibility

Introduction

This case study of a Fortune 500 automotive & transport company is based on a March 2022 survey of LiveAction customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

Challenges

This Automotive and Transport company experienced significant blind spots in its SDWAN and Data Center infrastructures. These limitations were having a negative impact on operations and business success.

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Fortune 500

Industry:
Automotive & Transport

“The capacity management and integration capabilities with Cisco led us to choose LiveAction as our NPM”

LIVEACTION CASE STUDY

Fortune 500 Automotive & Transport Company Selects LiveAction for SDWAN Visibility

Use Case

The automotive and transport company found the most value in LiveAction's following network monitoring capabilities:

- Searching, filtering, and granular analysis of network telemetry for faster diagnosis and troubleshooting
- Flexible and granular reports, predictive alerting
- A unified and user-friendly graphic dashboard

Results

LiveAction allowed them to achieve the following results:

- Faster problem diagnosis and root-cause analysis
- Improved operational efficiency which in turn supported business growth

This automotive and transport company evaluated the capabilities of LiveAction, NetScout, and ManageEngine before selecting LiveAction as the best fit for their needs.

About LiveAction

LiveAction provides end-to-end visibility of network and application performance from a single pane of glass. We provide enterprises with confidence that the network is meeting business objectives, full network visibility for better decisions, and reduced cost to operate the network.
