

## High-Performance Networking for a High-Performance World

### The Challenge

Maintaining high network availability and performance is crucial for manufacturing operations. Manufacturers rely heavily on uninterrupted network services to manage production lines, track inventory, support supply chain logistics, and operate machinery. Any network downtime can lead to significant financial losses, disrupt production, and harm the manufacturer's reputation.

Efficient network performance ensures quick and secure operations, fostering trust and satisfaction among clients and partners.

#### Did you know...

- **75%** of IT teams struggle to optimize and maintain their growing network
- **4 or 5:** the number of network monitoring tools used by enterprise companies
- **2 of 3:** IT managers say they fall-short when managing network visibility due to a lack of time and expertise

### The Solution

LiveAction's Network Intelligence Platform transforms complex data into actionable insights, providing organizations with a comprehensive view of their network. Customers can rapidly take action to resolve network issues at scale increase employee productivity and reduce business risk.

### Key Benefits

#### + Improve Network Visibility

Get full visibility into network and application performance across multi-vendor, multi-domain and multi-hybrid cloud networked environments.

#### + Accelerate Mean Time to Repair Network Issues

Proactively identify, troubleshoot, and quickly resolve network and application performance issues regardless of where they occur to speed time to repair, avoid costly downtime, and meet business needs.

#### + Drive Increased Customer Experience and Satisfaction

Uninterrupted network services are critical for maintaining a seamless user experience across production lines and facilities. This reliability helps manufacturers provide a superior operational experience, which can drive client loyalty and increase productivity.

#### + Enhanced Voice and Video Quality

Ensure clear communication for your VoIP and video conferencing applications, essential for seamless communication between headquarters, production facilities, and supply chain partners.

## Make Your Network Your Competitive Advantage

### Network Performance Monitoring

Powering seamless transactions, network visibility and customer experience.

Flow | API | SNMP | Cloud

### Packet Capture & Forensics

Rapid response and investigations into network performance & security issues for your manufacturing operations.

Network Packets

## Use Cases

Support uninterrupted network services to manage production lines, track inventory, support supply chain logistics, and operate machinery.

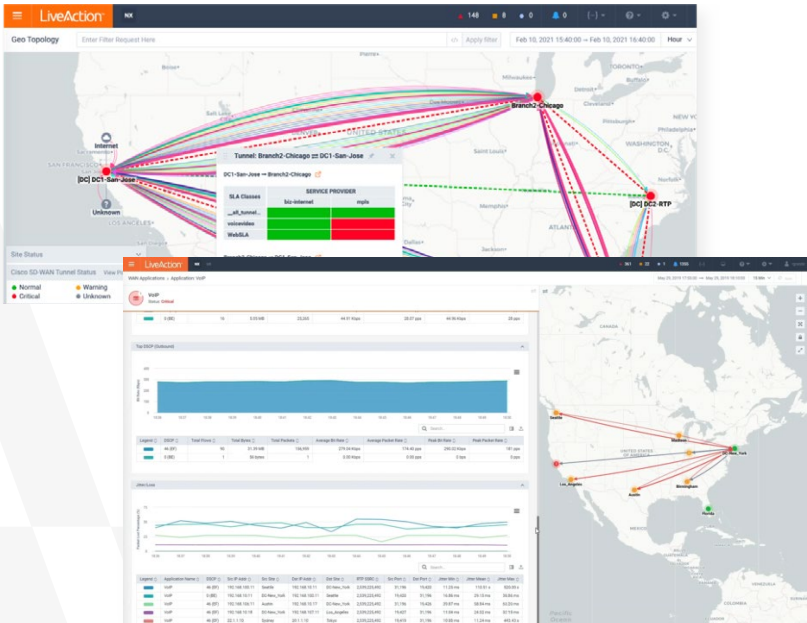

Rapidly detect and resolve network and security issues to prevent financial loss and maintain client and partner trust.

In-depth forensic analysis capabilities to investigate and understand the root cause of incidents quickly.

Unlock superior performance for your VoIP and video conferencing applications, essential for seamless communication between headquarters, production facilities, and supply chain partners.

"LiveAction helps us to free up time and reclaim part of the day to focus on proactive tasks and not just firefighting. We are also spotting stuff earlier and since its deployment, I would estimate that the time it takes us to find and resolve issues has been cut by 70%."

– Victor Oduneye, Global Network Services Lead for Bausch + Lomb

"LiveAction has the widest range of functionality and the best methods of storage and visualization of any of the tools out there."

– The Total Economic Impact™ of LiveAction LiveNX and LiveWire – Forrester 2023

"[The organization was] looking to upgrade the circuit for \$80,000 to \$100,000 a year until we used LiveAction to determine that was not the problem."

– The Total Economic Impact™ of LiveAction LiveNX and LiveWire – Forrester 2023
